

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Canceled)

2. (Previously Presented) The handheld computing device of Claim 7, wherein the predetermined communications connection is effectuated by dialing a predetermined telephone number.

3. (Previously Presented) The handheld computing device of Claim 7, wherein the predetermined number is the number for an emergency service.

4. (Previously Presented) The handheld computing device of Claim 7, wherein the user must depress and hold the two or more input keys for greater than one second to effectuate the predetermined communications connection.

5. (Previously Presented) The handheld computing device of Claim 7, wherein the user must depress four input keys simultaneously to effectuate the predetermined communications connection.

6. (Previously Presented) A handheld computing device, comprising:
 - a housing;
 - a processor supported by the housing;
 - a wireless telephony device coupled to the processor;
 - a display having a graphical user interface coupled to the processor; and
 - a plurality of input keys,wherein the device is programmed to effectuate a predetermined communications connection when a user depresses two or more input keys simultaneously and the device effectuates the predetermined communications connection when the wireless telephony device is either powered on or off.
7. (Previously Presented) A handheld computing device, comprising:
 - a housing;
 - a processor supported by the housing;
 - a wireless telephony device coupled to the processor;
 - a display having a graphical user interface coupled to the processor; and
 - a plurality of input keys,wherein the device is programmed to effectuate a predetermined communications connection when a user depresses two or more input keys simultaneously and the device effectuates the predetermined communications connection when the state of the software operating on the device is in either a non-communications mode or a communications mode.
8. (Previously Presented) The handheld computing device of Claim 7, wherein the device calls the emergency service by dialing 9-1-1.
9. (Previously Presented) The handheld computing device of Claim 7, wherein the device calls the emergency service by dialing 1-1-2.

10. (Previously Presented) The handheld computing device of Claim 7, further comprising:

a plurality of navigation buttons, wherein the device is programmed to effectuate the predetermined communications connection when a combination of the navigation buttons and the input keys is depressed simultaneously.

11. (Canceled)

12. (Previously Presented) The method of making an emergency request of Claim 14, further comprising the step of:

activating the two or more input devices for at least one second.

13. (Previously Presented) The method of making an emergency request of Claim 14, wherein the user must activate four input devices simultaneously to effectuate the communications channel to the emergency service.

14. (Previously Presented) A method of making an emergency request, comprising the steps of:

providing a handheld computing device having wireless communication capability and having two or more user input devices; and

activating two or more user input devices simultaneously, whereby the device effectuates a communications channel to an emergency service,

wherein the device effectuates the communications channel to the emergency service when the state of any software operating on the device is in either a non-communications mode or a communications mode.

15. (Previously Presented) The method of making an emergency request of Claim 14, wherein the communications channel is a telephone connection to an emergency service made by dialing 9-1-1.

16. (Previously Presented) The method of making an emergency request of Claim 14, wherein the communications channel is a telephone connection to an emergency service made by dialing 1-1-2.

17. (Previously Presented) The method of placing an emergency call of Claim 14, further comprising the steps of:

providing a plurality of navigation buttons and user input keys, wherein the device is programmed to effectuate the communications channel when a combination of the navigation buttons and the user input devices are depressed simultaneously.

18. (Canceled)

19. (Canceled)

20. (Canceled)

21. (Currently Amended) A handheld computer, comprising:
a processor;
a display including a touch screen coupled to the processor;
a plurality of user input keys coupled to the processor;
a wireless telephony device coupled to the processor; and
an operating system running on the processor;
whereby the operating system is configured to call an emergency service when
two or more user input keys are pressed simultaneously,

wherein the device effectuates is configured to effectuate the communications
channel to the emergency service when the state of any software operating on the device is in a
non-communications mode ~~or, and is further configured to effectuate the communications~~
~~channel to the emergency service when the state of any software operating on the device is in a~~
communications mode.

22. (Original) The handheld computer of Claim 21, wherein the handheld computer
does not include a mechanical telephone keypad.

23. (Original) The handheld computer of Claim 21, wherein the emergency service is
called when four input keys are depressed simultaneously.

24. (Original) The handheld computer of Claim 23, wherein the input keys must be
depressed simultaneously for at least one second.
